

# Hand Sanitiser Station

Help maintain hygiene standards on site with a portable Biosite Hand Sanitiser Station.

## A portable solution for site hygiene

For areas on site where hand washing facilities are not available or practical to install, Biosite's Hand Sanitiser Station provides a portable solution to enable operatives to comply with the latest hygiene guidelines\*.

Each station is made up of a portable trolley unit and hand sanitiser dispensers, complete with usage and safety information, that can be quickly set up where hygiene facilities are required. Putting you in control of hygiene practices on site.

\*Construction Leadership Council's 'Site Operating Procedures guidance (version 3)' and the Department for Business, Energy and Industrial Strategy's (BEIS) 'Working safely during COVID-19 in construction and other outdoor work.'

## Supporting the Lighthouse Club

In recognition of the increased pressure on construction workers and particularly the mental health challenges currently facing those in the industry, Biosite has pledged to donate 10% of sales of the Hand Sanitiser Station and any refills throughout 2020 to the Lighthouse Construction Industry Charity's crisis appeal. Each station will also feature details of the charity's Construction Industry Helpline mobile app, to raise awareness of the free mental health and financial resources available.

## Features and benefits

- A portable hygiene solution for areas on site where hand washing facilities are not available or practical to install
  - Enables operatives to easily access 'pop up' hygiene facilities and maintain best practice hygiene procedures on site
  - Each station comes with two hand sanitiser gel dispensers\*\* that can be easily refilled
  - Each station is rebranded with your company logo for clear visibility on site
  - Features usage and safety information and hand gel application instructions
  - Each station is H1500, W720, D640 or replaced - different sizing options and configurations are available
- \*\*Biosite will supply an alcohol-based hand sanitiser gel with at least 60% alcohol content

## Ensure best practice hygiene on site
