# **SITE SOFTWARE SOLUTION**

Manage pre-site and on-site workforce safety

# BIOSITE & WORK WALLET

Work Wallet is a powerful all-in-one software platform packed with health and safety features to help connect sites and people so you can manage everything needed in real time.

Work Wallet now integrates with Biosite biometric access control and workforce management technology solutions via secure API to offer a powerful health & safety solution for construction.

## Intelligently connects

People, Places and Processes together

## Work on and offline

Access information offline and upload when online

## Create

Jobs, RAMS, Audits, Safety Cards and Clock In/Out records

## Manage

All your staff and sub-contractors seamlessly

## Record

Near misses, accidents, incidents and site concerns easily

## Easy to use

On mobile, tablet or computer

## Connect your workforce

Connect your workforce supply chain together

# ABOUT THE PARTNERSHIP

Biosite has joined forces with Work Wallet to provide an effective digital solution to manage workforce, safety and asset data on site.

The two software platforms integrate via secure API connection, to bring together operative and site data. The powerful combination of pre-site and on-site features helps improve health and safety, efficiency and compliance on site. Real-time data is easily accessible via mobile app or desktop, to improve visibility and traceability – at both site and Group level. This helps establish a digital thread of information for construction companies.

## How it works

Before entering a site, operatives pre-enrol using Biosite's Online Induction system, meaning key information such as their qualifications and credentials can be checked and verified in advance. This information is linked to Biosite biometric access control systems at site entry and exit points, to integrate operative access permissions and history with their profile and approval status. This helps monitor time and attendance, competency, subcontractor levels and the ratio of critical site personnel on site, such as fire marshals and first aiders.

On site, Work Wallet software supports effective health and safety management, with selected software modules available to support construction. The safety card feature on both systems now integrates meaning operatives assigned a red card (for example if their qualifications have expired) on either system will be flagged and access permissions to site will be updated and restricted if required.

# MODULES FOR CONSTRUCTION

Safety Briefings

Permit to work

Contractor Gateway

Audits & Inspections

Safety Cards

Accident & Incident Reporting

Asset Inspections & Management

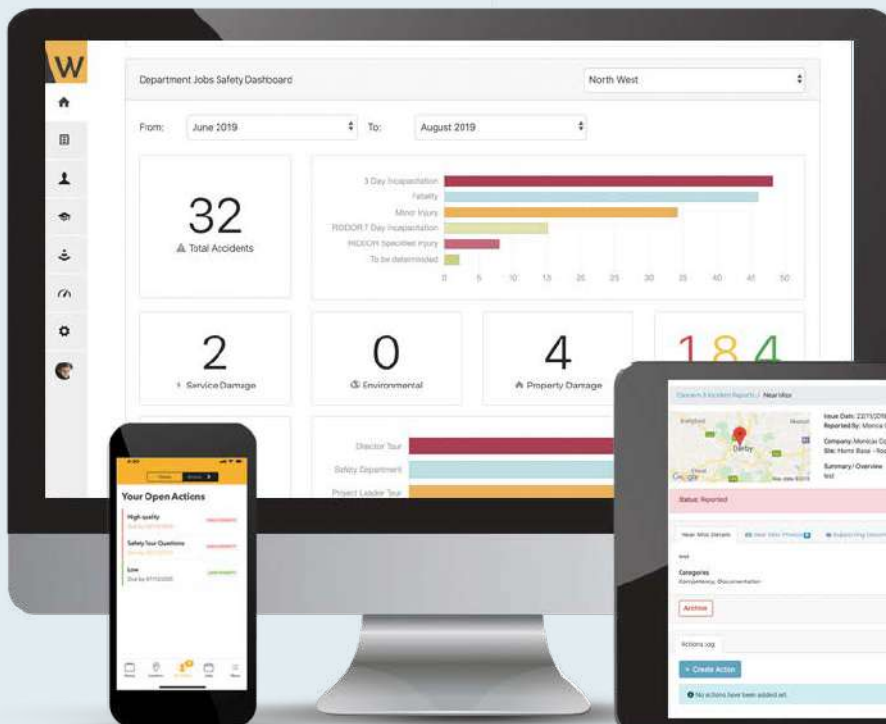

Job Management

Site Diary

PPE Manager

# ACCIDENT &

# INCIDENT REPORTING

You can easily report any concerns, near misses, unsafe incidents, hazards or accidents with the mobile app; capturing information and photos simply and quickly.

- Accident and near miss incident reporting.
- SMS reporting for members of the public or contractors.
- Escalation features.
- Easily assign actions to follow up and close issues.
- Flexible KPIs and reporting.
- Version control and tracked changes to report data.
- Offline data capture available.

# AUDITS & INSPECTIONS

Record and observe on the go with an easy to use system that captures a range of audits including Safety Tours, Environmental Checks, Welfare Inspections, Health & Safety Inspections and much more.

- Mobile app for easy on-site completion.
- Fully customisable checklists and options.
- Inspection scoring options available.
- Custom design templates to generate a fully branded PDF report.
- Linked actions to close out issues.
- Offline data capture available.

# PERMIT TO WORK

Get an instant, real-time view of your site permits and get that bird's eye view of all high-risk activity on site.

- With the mobile app, you can see at a glance which permits are currently open with real-time updates for when they are closed.
- With helpful alerts and reminders of upcoming or expired documents, always be on the ball with information at your fingertips.
- Build your own close-out processes and include options for photos and other information before the permit can be closed.

# SITE DIARY

Easily see all your Health and Safety site activity from inducted contractors, expiring permits, completed audits. With the addition of elements like weather forecasts for the day (or hour!).

- All site activity automatically recorded in one place.
- Easily see the critical observations you need to be aware of and simply click on each to see the specific record.
- With automatic feeds from all other connected modules, keeping an accurate diary of events has never been easier.
- Build an actual picture of site records with the ability to easily add your own photos and notes.

# SAFETY BRIEFINGS

Safety Briefing, Toolbox Talk or Safety Minute: whatever you call them, you can manage all aspects of your safety on Work Wallet.

Keeping your workers up to date with information is key to keeping everyone safe. The broadcast function facilitates custom messages to be delivered.

- Connect to every site, every employee and every contractor.
- Create safety briefings using text, pictures, videos and PDFs and send to your workforce and supply chain.
- They read, agree, sign, provide feedback and follow up actions can be created.

# PPE MANAGER

Managing PPE is difficult, time consuming, and paper chasing especially when it comes to monitoring stock levels at different sites, keeping track of the lifespan and who it was issued to.

But going digital will help:

- Record who has been allocated PPE.
- Accurate Control on stock - so no over ordering or out of date stock.
- Track allocations – People, Kit, Site and Dates.
- Our QR technology enables you to scan kit in and out of stores.
- Real-time maintenance records to ensuring your PPE is safe.
- Print PPE cards to give to site operatives.

# ASSET INSPECTIONS &

## MANAGEMENT

The mobile app lets your team easily conduct regular inspections of fixed assets of any type. With the AI defect tracking tool, you can significantly reduce the number of duplicate defects that are reported against items.

- Easily create observations and defects for items that have been checked.
- Assign actions to close out issues.
- View inspection history.
- Assign assets to users or sites.
- Management teams receive notifications when new defects are reported.
- Auto generated PDF inspection reports.

## CONNECT YOUR APPLICATIONS

**Work Wallet** can connect to all your Microsoft and Google cloud solutions - such as **PowerBI, OneDrive, Sharepoint, Active Directory, Outlook, MS Office, GoogleDrive and Gmail** - as well as we can custom connect to other systems.

- So now you can easily access your management data and create the reports you want!
- Customise your management dashboard by using our drag and drop system, helping your track KPIs and create reports to send digitally to your teams and management.

# JOB MANAGEMENT

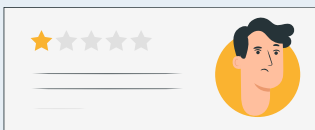

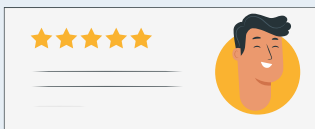

Every piece of information about a job all in one place. Create and share job packs, risk assessments, audits, training packs and all other documentation with our platform.

- The platform keeps all your documents in one place, giving you complete control.
- Create and manage your documents on the go and easily share with your team and supply chain.
- Work on and offline.
- Full version control history.
- It takes minutes to build, send or receive a document. Share with your team digitally to review, amend and sign off.

# SAFETY CARDS

Spot repeat offenders easily and help make sites safer with the Safety Card tool. Capture and record individuals' compliance of safety practices and reward your outstanding achievers.

- Red, yellow and green cards can be captured quickly on the mobile app.
- Observe on the go and record whilst on site.
- Automatic creation of a PDF for the safety cards created to easily share.
- Easily get an overview of your company's safety compliance and track your KPIs.
